## About This Software

### The ultimate way to present your experiences.

.Digital photos and smartphone videos disappear far too often. With **Photostory 2019 Deluxe – Steam Edition**, you can display your personal memories again: In interactive slideshows! First, select the photos and videos you want to show, then use highly efficient tools to edit and arrange them to create a total work of art. Add creative accents with the new 1-click photolooks, numerous effects and great background music. Naturally, the engine has also been designed for the new version – it's now possible to use twice as many tracks and more effects. At the end, you can watch the slideshows together with your friends and relive the memories. Almost like a photo album. Only better!

Are you looking for a truly personalized gift? The slideshows can be easily personalized and burned to DVD or exported to a memory stick. Presto!

### Your vacations, parties & excursions

Photostory works magic on each and every photo of your experiences. For every camera – also directly from your phone.

### The perfect look

From small beauty corrections to a flawless look: With automatic and advanced image editing, 1-click photolooks and look matching, you can optimize your photos to their maximum potential. Mercalli image stabilization takes care of your shaky videos.

---

## Always good for an eye-catcher

Your photos reflect your most precious moments. Thanks to the 1,500 effects and transitions, you can set accents and underline what was truly important to you. Use the music to put your friends in exactly the mood of that moment.

### Highlights

- Animated slideshows with effects & music
- Camera pans, zooms & rotations
- NEW! 1-click photolooks
- 1,500 effects, transitions & music
- NEW! Effect Wizard
- NEW! Extensive photo editing
- NEW! Redesigned program engine
- NEW! Directly import GIFs
- Automatic Photostory Wizard

magix photostory 2019 deluxe steam edition

Title of the Game should be called = \u041f\u043e\u0440\u0443\u0441\u043a\u0438 aka Ba rusky :p

its like a student project V maybe first timer making a game props on that

scary? nah not at all. dont waste your time. The first game was great. But this one is 100% like the first one. I hoped for something at least a little bit different.

So overall I can't recommend this game. But I admit it is a fine little game.. Got this in a Bundlestars bundle and have to say I've really enjoyed it. Brings back the 80's/90's nostalgia of solid platformers without the bugs/glitchiness that many of them had or the inherent issues of running games on those machines with such low memory. I think many people think that platformers or games, in general, have to rewrite history or remake the wheel to be great; no, they just have to be solid and fun. My only real complaint would be (and it's minor) that I wish certain enemies made sound. Like, if something is flapping its wings to fly around you, it should make little 8-bit "beep boops" lol. Is it worth \$7.99 if you don't catch it on sale or in a bundle? Ehhhh... maybe... probably not. Sorry, it's probably a few dollars high. \$4.99-5.99 would have been the sweet spot if I had bought it seperately, but \$7.99 isn't downright horrible.. I feel scared and stupid. Worth it.. Just got this game back after several years. (computer prob) Fun as always. Very quick games; easy to learn but hard to win, at least in a large way. Easy to get hooked on. The price is only \$10.00, and worth every penny.. Great pack, no need to buy labour or officer badge each month as its permanent ;). The playerbase is nearly non-existent. I go to search for a game and there are 4 other people online at all. Do not buy it for the extra online options, as there are no players to experience them with you. Might be fun with friends, though.

The purchased story is not worth it at full price. It's fun to run around piloting a mech, but the story's only about 2 hours long, and is essentially just a VR rail shooter. It's also extremely cliché. The bad guy is super bad, the good guys are super good.

Maybe get it on 50% off or something, try out the multiplayer, it's free after all. Overall it's a decent enough game, mechanics wise.. Just a puzzler, you'll find many better free at kongregate.

It has a few design flaws that make me wish I didn't pay for this.

The biggest flaw - speed. No boost, no fastforward, heck even the UI moves slow in this game. This game needs accuracy if you aim for the top score, you will have to restart a lot when you miss with the thrust. Maybe it's a little thing, but it made me rage quit the game - each and every time you restart you have to stare for 1-2 seconds at the mission title screen.

Also, a minor one here, none of the buttons have captions. I can guess what which button does, but I'd be glad to be sure what it does after I point at it, you know?

---

No Spoilers; Being as vague as possible.

I'd say I'm an avid fan of CoG games, and while my favourite series still remains as the original Hero's Rise trilogy, the Craftverse has been a close runner up since Choice of the Deathless.

This game does not fail in helping to familiarize the player with the universe, but does quite a bit of info dumping, and doesn't explain a lot of the phrases and sayings. It's easy to pick up on it, as long as you're paying attention and are willing to get sucked into the universe. Though, that could just be me, as I am a huge fan of subtle, thrown in head first, type of world building, as opposed to being coddled like a child and being told what everything means through copious amounts of text that I'd end up skipping anyway.

This does end pretty abruptly, which is a huge downside. The ending I got on my first run through seemed really, really quick, as if little-to-no thought was put into it. Especially when it seemed like the story was just getting started, about ready to go head first into some topsy turvy plot filled story of trust and betrayal. But it never came. It just. Stopped! I mean, I got the ending I wanted with the character I wanted to romance, but it still felt hollow after playing a good few hours and becoming invested. My disappointment is real.

Nonetheless, I really did enjoy all that led up to the ending. It was incredibly fun, and allowed me to create a character I was happy with, for the most part. Perhaps not as happy as I was with my CotD character, but still. I could basically sleep with everyone, and that's enough for me and my romance craving soul.

I still just wish there was more! If you're a fan of this universe, please do play this, and expand your knowledge of this wonderfully crafted universe. But if you're not, I'd first off suggest going for CHOICE of the Deathless, or even going and reading one of the novels by this writer.. It is a fantastic Mega Man style game with responsive controls.

- Every level has something unique about it to make every stage feel different.
- The music is amazing and incredibly catchy.
- The powerups you gain in the 2nd world are mostly useful and make Mibibli feel more powerful compared to the start of the game.
- There are difficulty settings.
- . We have all been there; you see a good space sci-fi, or played halo, and now you got the itch to go out there and conquer the stars yourself. Well this game will defiantly not disappoint you there, star rulers is a massive space empire building civic builder. Be WARNED this is an indie game and as such is not as refined as other titles, but the game is fairly cheap and it is just very satisfying about blowing up a star to kill your enemies.
- . Two people did this? Impressive as h\*\*! Really good work. The universe feels a bit empty sometimes and can be a bit repetitive but remember its early access! It really is an awesome experience flying around in an awesomely designed repurposed transporter and blowing up enemies!. Extremely simple concept, but controls are tight and gameplay is so simple that my 3 year old nephew can play it. Worth getting if you want a game for small kids.. Best game if you are feeling suicidal. Worst game ever award DO NOT BUY.. Huum, pay to have the 2D map, bad!. The best Lego game ever made.. My first impressions:

I played already the first chapter and it was really short, but I liked it. So today finally the second chapter came out and after a peek in the game, I already see that there definitely is some work put in here. Details are important and it shows. Also the narrative is interesting and it really seems, that they aren't lying about, that you should listen/read carefully. If things keep going in this direction, it will be a great game definitely worth its price. I will update the review when I finish this chapter.

Btw.: Thank you for this nice birthday gift!
